

ANNAH MWERU NICHOLA

Full Stack Developer

Nairobi, Kenya · annmweru9@gmail.com · +254 714 691 909 · annahmweru-dev.netlify.app

PROFESSIONAL SUMMARY

Full Stack Developer with 4+ years of experience building scalable web applications across government, financial services, and enterprise environments. Delivered production Angular and Node.js applications on the live Ardhisa government platform, high-volume digital banking products at I&M Bank, and full-stack internal systems in petroleum logistics. Proficient in React, Angular, TypeScript, Node.js, Spring Boot, REST/GraphQL APIs, PostgreSQL, MongoDB, Docker, Kubernetes, and AWS/Azure CI/CD deployments. Experienced in OAuth 2.0, JWT authentication, XSS prevention, and WCAG accessibility. Agile practitioner with a track record of code reviews, mentorship, and cross-stakeholder collaboration.

CORE TECHNICAL SKILLS

Frontend Frameworks: Angular (v8–v18), React, AngularJS, TypeScript, JavaScript (ES6+), HTML5, CSS3, SCSS

State Management: NgRx, RxJS, Redux, Zustand, Context API, Signals, Observables

Backend & APIs: Node.js, NestJS, Spring Boot, RESTful APIs, GraphQL, SOAP/XML, OAuth 2.0, JWT

UI & Accessibility: Angular Material, Tailwind CSS, Bootstrap, Figma (pixel-perfect), WCAG 2.1

Databases: PostgreSQL, MySQL, MongoDB

DevOps & Cloud: Docker, Kubernetes (KCNA), AWS (EC2/Lambda), Azure, GitHub Actions, GitLab CI/CD, Vercel, Netlify

Testing: Cypress (E2E), Jest, Jasmine unit, integration, and end-to-end

Security: XSS prevention, RBAC, JWT, SQL injection prevention, rate limiting, data encryption

Collaboration: Git, GitFlow, Trunk-based dev, Agile/Scrum, code reviews, technical documentation, OpenAPI/Swagger

PROFESSIONAL EXPERIENCE

Full Stack Developer | Woodsman Limited — (Hybrid) May 2026 – Present

- Design, develop, and maintain full-stack web applications using Angular (frontend) and Node.js (backend) to support petroleum logistics and transport operations.
- Build and consume RESTful APIs with clean data contracts, validation, and error handling across the stack.
- Design PostgreSQL and MongoDB schemas; write optimised queries to support operational data across the business.
- Implement JWT authentication and role-based access control (RBAC) to protect sensitive operational data.
- Containerise and deploy backend services using Docker and AWS, maintaining environment parity across development and production.
- Write and maintain unit and integration tests (Jest) to uphold code quality and prevent regression.
- Conduct code reviews enforcing performance, scalability, security, and maintainability standards.
- Participate in Agile/Scrum ceremonies: sprint planning, stand-ups, backlog refinement, and retrospectives.

Frontend Developer | Konza Silicon — Ardhisa (Government Platform) Feb 2022 – Nov 2025

- Led zero-downtime migration of the entire SPA from Angular v8 to v16 on a live government production platform, maintaining continuous service throughout a risk-managed release cycle.
- Designed and built reusable Angular UI component libraries with strict separation of business and presentation logic, reducing developer onboarding time and enabling IT Operations self-sufficiency.
- Integrated frontend with RESTful, JSON, and SOAP/XML backend services for the Land Search workflow, managing complex async data flows via RxJS Observables.
- Built multi-stakeholder approval workflows for Long-Term and Short-Term Lease Applications using reactive state management and backend-driven PDF generation.
- Implemented a Bulk Printing feature for Sectional Registration Plans using Node.js, enabling simultaneous certificate processing and significantly reducing manual turnaround time.
- Conducted structured code reviews across all Angular modules; enforced standards via Husky pre-commit hooks, reducing broken builds and improving overall code quality.
- Delivered pixel-perfect, WCAG-accessible interfaces by translating Figma designs into production Angular code.

- Served as interim Team Lead: coordinated sprint tasks, maintained delivery timelines, and conducted knowledge-transfer sessions with IT Operations teams; mentored junior developers on Angular best practices.

Frontend Developer Intern | Metropol Corporation — Credit Reference Bureau *Sep 2021 – Jan 2022*

- Integrated RESTful APIs to dynamically populate dashboard views with real-time credit bureau data, handling data binding, error states, and loading feedback.
- Participated in QA testing and bug fixing, identifying UI inconsistencies and ensuring cross-browser compatibility across dashboard modules.
- Debugged and stabilised production issues in a multi-tenant financial reporting system serving 50+ institutions.
- Gained experience in compliance-conscious, data-sensitive application development handling financial and personal credit information.

EDUCATION

BSc Information Technology *Second Class Upper*

Zetech University

Diploma in Information Technology *Credit*

Zetech University
